## EXPERIENCE

### Renaissance Innovations Labs, RIL — Frontend Developer

OCTOBER 2021 - PRESENT

So far, the following have been successfully implemented:

- The consumption of REST API endpoints with a mastery of asynchronous Javascript, fetch API and axios package.
- Building of dashboards with the use of state, hooks and react-router-dom in react.
- Translation of wireframes and PSD designs to functional, progressive and responsive web apps with the use of tailwindCSS, even using tailwind's JIT.
- Managed version-control in projects using Git & GitHub, working on existing projects, improving on the code and making it more efficient, thereby improving on performance significantly.

### SMFEST, socialmediafest.com — Frontend Developer

JUNE 2021 - OCTOBER 2021

A part of the team that built the SMFEST site at [www.socialmediafest.org](http://www.socialmediafest.org), an annual nationwide event that had its maiden edition in Owerri on 23rd October, 2021.

- Executed the implementation of a portal for an online shop for the sale of SMFEST polos, caps and cardigans.
- Created web responsive pages with react and tailwindCSS for styling while interpreting PSD designs and wireframes to build the site.

### Rivers Got Talent, Port-Harcourt — Freelance

DECEMBER 2020 - JANUARY 2021

Built the site [www.riversgottalent.com](http://www.riversgottalent.com), a website for the annual talent show, Rivers Got Talent:

- Implemented an online paid voting platform with Paystack into the website.
- Also implemented the online registration portal for the show, while working as the personnel in charge of managing and updating information on the show's website.
- Also paid attention to SEO and enhanced the sites visibility on search engines.

## PROGRAMMING STACKS

HTML & CSS

Vanilla Js

React Js

Git & GitHub

Next.js

React Native

Extras:

TailwindCSS/TailwindUI & Material-UI

Wordpress

Typescript

Express (Node) Js

Data structures and algorithms

PostgreSQL

MongoDB

C++

## INTERESTS / HOBBIES

Tech, Sports (Football), Music, Video Games (FIFA)

## LANGUAGES

English, Nigerian Pidgin, Igbo and French.

## Oceansavy, oceansavy.com — *Freelance*

AUGUST 2021 - SEPTEMBER 2021

Built the [www.oceansavy.com](http://www.oceansavy.com) blog, and created a responsive and interactive blog for lovers of the ocean. Created an easy-to-access and use post and comment sections for both the admin and the users using wordpress and its plugins for most of the build. Tailored the site with an SEO-friendly build, thereby improving its visibility on search engines.

## SOME OTHER PROJECTS

### Forex Dashboard — *Personal React Project [2021]*

[liberty-crypto-frontend-boma25.vercel.app](https://liberty-crypto-frontend-boma25.vercel.app)

- Built a Forex business site with user login authentication as a personal project.
- Executed the consumption of the REST API endpoints.
- Built the login dashboard of the site while executing the live visualisation of the changes in the currency trade pairs using graphs.
- Successfully implemented a more interactive dashboard using Material-UI as a component library and tailwindCSS for styling.
- Added other Forex site features including live update of the constant changes in the values of the forex currency trade pairs.

### Booking System — *Personal React Project [2020]*

- Created a booking system that could be used to set an appointment with a professional (in this case, a barber).
- Implemented a login form frontend, adding custom calendar sections, with a collaborator handling the user authentication and backend of the project.

### Material UI progressive Form — *Personal React Project [2020]*

- Created and developed a Progressive-UI form using react with the help of and Material-UI for tailwindCSS for styling
- With the use of states and hooks, implemented a multiple-step form with a success message at the end of the form-filling process.

## EDUCATION
