PROJECTS

Design and Implementation of an Automated Root Vegetable Cutter and Automatic Hand Sanitizer — *Final Year Project [2021]*

Built a machine that automatically detects when food items are placed in a compartment and begins dicing the root vegetable into the appropriate size. Also incorporated an automatic hand washing and sanitizer system all in accordance with the COVID-19 directives.

Rivers Got Talent Website— *Freelance [2020]*

Designed and built www.riversgottalent.com, implementing a voting platform incorporated into the website.

OceanSavy— *Freelance [2021]*

Designed and built www.oceansavy.com, an informative blog on matters relating to transportation by sea.

Exxon-Mobil Dormitory Project— *Internship [2019]*

Worked on the Exxon-Mobil Dormitory project with Mercury Engineering and Constructions Company as an intern to install electrical fittings and communications accessories and devices.
